

Student-led Societies with Focus on Sustainability

Jordan University of Science and Technology (JUST) actively fosters student engagement in sustainability through various clubs, initiatives, and international collaborations. This document highlights key examples of how JUST supports and encourages students' involvement in sustainability efforts.

AIChE Student Chapter

The American Institute of Chemical Engineers (AIChE) Student Chapter at JUST, established in 2016, offers chemical engineering students opportunities for professional development. Members participate in regional and national conferences, access AIChE publications, and are eligible for scholarships. The chapter aims to promote the chemical engineering profession, enhance student awareness, and facilitate collaboration among students and faculty.

IAESTE-JUST Local Chapter

Established in October 2018, the IAESTE-JUST Local Chapter provides engineering students with paid international training opportunities, facilitating global exposure and practical experience in their fields. The chapter includes volunteers from various engineering departments and operates under the guidance of the Assistant Dean.

IEEE Student Branch

The **IEEE Student Branch** is part of the global IEEE network, which provides students with opportunities to engage in technological innovation and sustainability-focused projects. The branch encourages students to participate in workshops, competitions, and research initiatives related to engineering, technology, and environmental sustainability. By fostering interdisciplinary collaboration, the IEEE Student Branch helps students develop practical solutions for global challenges, aligning with JUST commitment to sustainability and innovation.

Association of Energy Engineers (AEE) Student Chapter at JUST

The **AEE Student Chapter at Jordan University of Science and Technology (JUST)** is part of the global **Association of Energy Engineers (AEE)** network, which focuses on advancing energy efficiency, sustainable technologies, and renewable energy solutions. The chapter provides students with access to professional development opportunities, industry events, and networking with experts in the field of energy and sustainability. Through workshops, research projects, and technical training, the AEE Student Chapter equips students with the skills and knowledge needed to address global energy challenges, reinforcing JUST's commitment to sustainability.

Department of Activities and Student Initiatives

Under the Deanship of Student Affairs, this department organizes a variety of programs, including seminars, workshops, and cultural, artistic, social, and volunteer activities. It supports student initiatives, aiming to cultivate creativity and a sense of responsibility. The department also oversees student organizations and showcases talents in areas such as calligraphy, painting, music, and acting.

Student Initiatives

The Student Initiatives division encourages students to transform their ideas into reality, promoting personal development and social responsibility. It motivates students to engage in extracurricular activities and collaborate with local community institutions. Notable initiatives include the Basma Initiative, Nasmou Initiative, and Health Ambassador Initiative.

Arab Association of Veterinary Medical Faculties

JUST's Faculty of Veterinary Medicine is a member of the Arab Association of Veterinary Medical Faculties, collaborating with regional institutions to enhance veterinary education and research. This membership fosters international cooperation and knowledge exchange in veterinary sciences.

Student Clubs and Regulations

JUST has comprehensive guidelines and goals for student clubs, ensuring their alignment with the university's values and sustainability principles. These regulations outline the framework for student engagement in extracurricular activities and community service.

Innovation Groups

The Center of Excellence for Innovative Projects (CEIP) at JUST has established Innovation Groups. These groups aim to foster creativity and competitiveness among students, particularly in engineering and information technology fields. By overcoming obstacles to creativity, the CEIP helps discover and invest in students' talents, aligning with the university's commitment to sustainability through innovation.
